WARNING

Please read installation instructions carefully prior to installing. Before using the product thoroughly test the fully-weighted product (with equipment in place) to ensure the product has been installed properly. Do not allow children to play on product. ITW Brands is not responsible for any damage resulting from improper installation, overloading or product failure.

- 1 This rack has been designed to be installed into studs 16" on center.

Determine the height by taking your longest pair of skis, placing them into rack while holding rack against wall.

Make a mark at this level through screw holes.

- 2** Both wood screws must be fastened into a vertical stud inside the wall.

Mark holes through rack mounting plate and drill 1/8" pilot holes. Install screws into vertical stud. Tighten screws firmly.

A USING THE SKI RACK

Place skis so the bottoms of both are facing each other. Interlock the brakes on the skis so the two skis are joined together with one brake over the other one.

Place the joined skis between the double hook and the ski tips will wedge into position holding the skis. Poles can be hung by handle straps on the single hooks.

Weight limit: 40 lbs.
